

## *"Northern Farm"*

*One aspect of the machine world which has not had sufficient attention is the relation of the machine age to the mystery of human joy. If there is one thing clear about the centuries dominated by the factory and the wheel, it is that although the machine can make everything from a spoon to a landing-craft, a natural joy in earthly living is something it never has and never will be able to manufacture. It has given us conveniences and comforts but human happiness was never on its tray of wares.*

*- Henry Beston*

**We have added a portion of natural joy and human happiness to this camp's "tray of wares".**

**Come join us!**

## About our program:

Non-Point pollution and its effects on water quality is the focus of this year's Camp. Our trips to local lakes, rivers, and streams will feature both pristine areas and developed areas. We will examine how human activities impact the quality of our waterways. Camp programs will include sessions on wildlife, soils, erosion, ecosystems and aquatic habitats. Our goal is to broaden the experiences of youth who are interested in the environment. Land and Water Conservation employees teach most of our programs.

## Where is Camp held?

Camp is held at Trail's End Youth Camp (near Bruce, WI) in Rusk County. It is located on the banks of the Chippewa River and is perfectly suited to environmental learning. Camp facilities include kitchen, dining hall, cabins with bunks, swim area, canoe access, nature trails, and a shower house with flush toilets.

## Who can attend?

Camp is designed for students who have completed grades 8, 9 or 10 and are interested in learning about the environment. Registration cost for 2007 is \$100.00 per student. County Land and Water Conservation Departments and other local conservation organizations offer tuition scholarships.
